

The Green Drinks Company are proud of their partnership with Global Ethics in offering the One Water drinks range in the Pouchlink™ System. Global Ethics supports the wonderful work of the One Foundation, a UK registered charity working with communities in Africa to address the most pressing humanitarian needs such as clean drinking water. Every sale of a One Water drink through the Pouchlink™ System generates a donation to this work including the installation of Playpumps®. Playpumps® allow children to play and by spinning around, the pumps draw fresh drinking water from as deep as 100 metres below the ground. With 1 billion people having no access to clean water and millions dying each year from drinking contaminated water, this charitable work is already changing the lives of over one million people. One Water and Pouchlink™ are a perfect partnership to help promote healthy refreshment and also help the people of Africa who do not enjoy the same opportunities.

One Water Everyday Range: A range of refreshing juice drinks made with real fruit juice but giving maximum hydration. Provides a zesty fruit flavour for maximum refreshment. The range contains natural fruit flavours with no artificial colours and no added sugar
