GOOD FOR YOU, GOOD FOR THE PLANET

Be part of the green revolution in cold drinks vending

The most important innovation in cold drinks vending in a generation:

The patented Pouchlink™ spout allows flexible pouches to be linked together to form strong and flexible chains which are rolled on to a spool which holds 250 pouches. At the press of a button, the machine takes a pouch, uncaps it and fills it with a chilled, filtered, fresh juice drink before recapping it and delivering it to the consumer...all within a matter of seconds.

The unique linking system creating strong but flexible chains

A wide range of healthy cold drinks

The Pouchlink™ System offers a wide range of branded, healthy drinks which caters for all consumer needs from refreshing flavoured waters through to high juice drinks which are fully schools compliant. Our concentrates are hygienically packed in bag in boxes to provide long shelf life under ambient storage. The unique connection system maintains sterility and gives extended shelf life even when the box has been opened.

Pouchlink, for planet-friendly refreshment, it all adds up.....

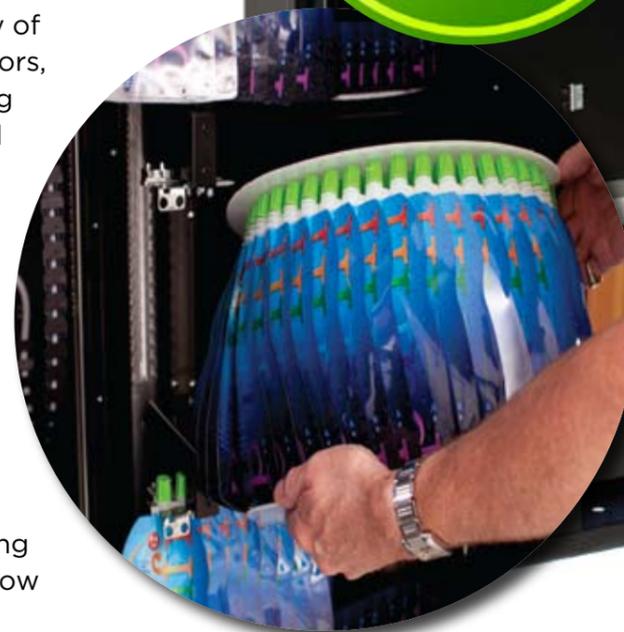

- Pouches use up to 75% less material than conventional drinks packaging and are resealable and convenient
- Using filtered mains water dramatically reduces the food miles associated with transporting packaged drinks
- Saves up to 80% of the energy used to chill conventional vendors
- Pouches produce up to 90% less volume waste than bottles and cans and are recyclable

All you need to load 1000 drinks can be easily transported

Easy to operate for greater profit

With 1000 drinks capacity, the Pouchlink™ System has up to 3 times the capacity of conventional vendors, reducing restocking times. Using filtered and chilled mains water dramatically reduces the costs associated with bulk transport and storage of packaged drinks. Furthermore, the machine can be fully loaded in minutes and with its automated, chemical-free self cleaning capability, this is a very low cost system to operate.

1000 drinks can be loaded easily in minutes. 1 spool is equivalent to 10 cases of cans or bottles!

Technical Specification

SPECIFICATIONS

DIMENSIONS: 1866mm H x 754mm W x 768mm D

SELECTIONS: 7 selections - 6 flavours + chilled filtered water

CONCENTRATE CAPACITY: 30 Litres (6 x 5 Litre BIB) max

POUCH CAPACITY: 4 spools x 250 pouches each = 1000 pouches

WEIGHT: 205 KG

POWER SUPPLY: 230VAC/50 hz

WATER SUPPLY: Mains water, min 1.5 bar pressure / max 10 bar pressure

ENVIRONMENT

Indoor Use Only - for installation in temperature range of 3° to 25°C

CONNECTIONS:

ELECTRICAL: fused 13 amp moulded plug on 2.5 metre cord - to be connected to mains voltage 13 amp switched socket

WATER: 3/4" BSP male threaded fitting at water inlet; to be connected to mains water supply with 1.5 bar min. pressure.

STANDARD FEATURES

REFRIGERATION: Modular refrigeration cassette

REFRIGERANT: R-134A

THERMOSTAT: Automatic, via electronic control

FILTER: Inlet water filter: 0.2 Micron filter cartridge

HYGIENE: Self-flushing dispensing system, as well as automated ozone self-cleaning

PAYMENT SYSTEMS: MDB Compatible

CABINET AND DOOR: Zinc Coated Steel, powder coated finish

SIGNAGE: Full colour Polycarbonate panel, incorporating clear viewing window

LIGHTING: LED for signage backlighting, cabinet interior and vend port (sequentially lit during vend cycle). Offers lower energy consumption and extended service life

PERFORMANCE DATA:

DELIVERED DRINKS TEMPERATURE: 4° - 6°C

ENERGY CONSUMPTION: 2.2 kW-h / 24 hr

OPTIONS

Lockable Coin Changer Security Door

Curved Kickplate

Wall Securing Bracket
